Professional Summary

M.Sc. Computer Science graduate (Pondicherry University) with strong foundations in data structures, algorithms, and database design, and hands-on experience building backend systems, REST APIs, and AI-powered applications using Python, Java, and modern full-stack tools. Practical exposure to retrieval-augmented generation, semantic search, and containerized deployments. Fast learner seeking an entry-level Software Engineering role to design and build scalable, real-world applications.

Education

Pondicherry University

2024 _ 2026

M.Sc. Computer Science

CGPA: 7.92 / 10

Tagore Government Arts and Science College

2021 _ 2024

B.Sc. Computer Science

CGPA: 6.98 / 10

- Relevant Coursework: Data Structures, Algorithms, DBMS, Operating Systems, Artificial Intelligence, Machine Learning, Computer Networks, Software Engineering

Technical Skills

Programming Languages: Python, Java, JavaScript, SQL, HTML5, CSS3

Backend Development: FastAPI, REST API Design, Authentication, Authorization, Role-Based Access Control

Frontend Development: Bootstrap, JavaScript, HTML, CSS

Databases: PostgreSQL, MySQL

Storage: MinIO

Artificial Intelligence: Ollama, Large Language Models, Retrieval-Augmented Generation (RAG), Semantic Search, Vector Databases (Qdrant)

Developer Tools: Git, GitHub, Docker, Linux, VS Code, Postman

Core Concepts: Object-Oriented Programming, Data Structures, Algorithms, Operating Systems, DBMS, Computer Networks, Software Development Life Cycle

Additional Technical Skills: CAD/CAM Software, Networking, VPN, Firewall, Technical Process Optimization.

Projects

1TVA Platform AI-Driven Intelligent Document Management and Semantic Retrieval System

Python, FastAPI, PostgreSQL, MinIO, Qdrant, Ollama, Docker, Bootstrap, Jinja2, Linux

- Architected a secure, self-hosted private cloud storage platform combining traditional file management with AI-powered document understanding, inspired by tools such as Google Drive and NotebookLLM.
- Designed a modular service architecture separating frontend (Bootstrap, JavaScript), backend (FastAPI), object storage (MinIO), relational metadata storage (PostgreSQL), and an AI layer (Ollama, Qdrant).
- Implemented session-based authentication with role-based access control, per-user storage quotas, and secure file ownership verification.
- Built a retrieval-augmented generation (RAG) pipeline enabling semantic search, AI-based document summarization, and
- natural-language "ask your documents" chat.
- Deployed the full stack via Docker Compose on Linux with LAN/remote access, file preview support, an admin dashboard,
- and a responsive, Android WebView-compatible UI.

IGRIS Voice Assistant

Python, Speech Recognition, Text-to-Speech, Multithreading, OS APIs

- Built a cross-platform, multithreaded voice assistant enabling natural-language system automation, application launching and web search via voice commands.

CK Department Store Billing System

Python, HTML, CSS, JavaScript, Bootstrap, SQL

- Developed a billing and invoicing system with customer management, sales record tracking, and a responsive dashboard,
- reducing manual billing effort

Dental Clinic Website

HTML, CSS, JavaScript, Bootstrap

- Designed and built a responsive, SEO-friendly website with service pages and contact forms to improve a local business's online presence.

Certifications

NASSCOM DFIR Gold Certificate in Cyber Security | Full Stack Web Developer Certification | NPTEL _

Business Analytics | pursuing Cisco Certified Network Associate (CCNA)

Leadership

Co-Founder, Cupertino Institute for Technical Education

Organized technical workshops and mentored students through project-based learning.
